Education

Politecnico di Milano
Master's in Computer Science and Engineering (2024 – 2026)
Relevant Courses: Machine Learning, Database Management, Cloud Computing, Software Engineering
GPA: 3.8/4.0

Politecnico di Torino
Bachelor's in Computer Engineering (2021 – 2024)
GPA: 3.7/4.0

Work Experience

Software Development Intern
Amazon, Milan, Italy | Summer 2025

- Developed a scalable web service using Flask and React, improving system efficiency by 20%.
- Worked with AWS Lambda and DynamoDB to build cloud-based solutions.
- Collaborated in an agile environment with cross-functional teams.

Data Analyst Intern
Alix Srl, Milan, Italy | Jan 2024 – June 2024

- Built interactive dashboards in Power BI, improving data visualization for business insights.
- Used SQL and Python (Pandas) for data extraction, transformation, and analysis.
- Conducted exploratory data analysis to identify trends and patterns.

Projects

AI-Powered Chess Trainer

- Developed an AI-based chess training tool using Python and React.
- Implemented chess move recommendations using Stockfish and machine learning.
- Deployed the project using Docker and AWS EC2.

Students & Companies Platform

- Designed a web platform connecting students with internships and job opportunities.
- Used Flask for the backend and React for the frontend.
- Integrated authentication and role-based access control.

Skills

- **Programming Languages:** Python, Java, SQL, JavaScript

- **Web Development:** React, Flask, Node.js

- **Data Science & Analytics:** Pandas, NumPy, Power BI

- **Cloud Technologies:** AWS, Azure

- **Version Control:** Git, GitHub

Languages

- English (Fluent)

- Italian (Native)

- French (Intermediate)

Certifications & Awards

- AWS Certified Cloud Practitioner (2024)

- Google Data Analytics Certificate (2023)

Extracurricular Activities

- Member of the AI & Machine Learning Student Club at Politecnico di Milano

- Volunteer tutor for programming courses
